

## SPA Petrol Retail Contractors Safety Passport Remote Learning

### Course Aim

This course is designed to help delegates work safely and confidently in a Petrol Filling Station Environment. It focuses on recognising hazards, applying control measures, and following safe working practices to maintain a safe workplace.

The remote learning course follows the same curriculum as the [SPA Petrol Retail Contractors Safety Passport](#) classroom-based course remote learning format.

### Who Should Attend?

The SPA Petrol Retail Contractors Safety Passport Remote Learning course is intended for all contractors working on petrol filling stations. Delegates who work on, in or around a petrol forecourt, transport fuel or come into contact with dangerous oils or mis-fuelling in your job, will need a passport to be eligible to work on site.

### Day 1 Exemption

If you've already completed a recognised SPA health and safety course, you may be eligible to apply for an exemption for Day 1 of this course, and attend only the Day 2, petrol specific session. To qualify you must have completed one of the listed courses below and have at least 3 months left on your course certificate when you apply:

### Approved Courses for Day 1 Exemption:

#### IOSH Courses:

- IOSH Working Safely
- IOSH Managing Safely
- IOSH Supervising Safely

#### NEBOSH Courses

- NEBOSH National General Certificate in Occupational Health and Safety
- NEBOSH Level 6 National Diploma for Occupational Health and Safety Management Professionals

#### CCNSG Courses

- CCNSG Passport to Safety

#### CITB Courses

- CITB - Site Management Safety Training Scheme (SMSTS)
- CITB - Site Supervision Safety Training Scheme (SSSTS)
- CITB - Site Safety for Shopfitters and Interior Contractors

#### Other Courses

- FÁS Safe Pass
- ADT H&S Module

## SPA Petrol Retail Contractors Safety Passport Remote Learning

### Agenda

The course is split into two days, covering core safety principles and petrol retail-specific risks.

#### Day 1 - SPA (Core) Training

Day 1 aims to introduce essential Health & Safety topics that apply across the workplace:

- **Organising for Safety:** Aims to outline legal responsibilities, hazard control, and the role of enforcing authorities.
- **The Workplace:** Designed to highlight what contributes to a safe work environment, including hidden hazards, working at height, asbestos, confined spaces, and permit-to-work systems.
- **Tools, Plant and Machinery:** Aims to cover risks from powered and non powered work equipment, energy sources, and workplace transport.
- **Health:** Intended to raise awareness of health risks such as hazardous substances, manual handling, noise, stress, musculoskeletal issues and how to control them.
- **Procedures:** Aims to emphasise the importance of procedures, including emergency procedures and first aid.
- **The Environment:** Designed to introduce environmental responsibilities, safe storage, waste management and emergency planning

#### Day 2 - SPA Petrol Retail

Day 2 aims to cover two modules focused on a petrol filling station and safe working practices:

- **Hazards on a Petrol Filling Station:** This module aims to outline the types of hazards on a petrol filling station including fuel hazards, delivery hazards, customer hazards, contractor hazards, other hazards, along with fuel properties, restricted areas on a petrol forecourt, hazardous zones, zone classification and vapour recovery.
- **Controlling Work on a Forecourt:** This module is intended to introduce safe forecourt management through effective communication, safety method statements, clearance certificates, permits to work and task classification.

### Certification

Delegates who successfully complete this course will receive a SPA Safety Passport Photo ID card, valid for 3 years.

### Course Duration

This is a 2 day course
