

Radio Frequency Awareness

Course Aim

This theory based course aims to enable delegates to have an understanding of:

- The hazards associated with working near radio frequencies and recognising restricted areas
- Reducing and preventing exposure of electromagnetic radiation and potential side effects on the body
- Monitoring and measuring equipment

Who Should Attend?

Those who need to work near, or in radio frequency radiation fields.

The course syllabus is approved by National Grid Wireless, as part of the qualifications required to access their sites.

Course Duration

This is a half day course.

Certification

Delegates successfully completing the course will receive a digital certificate of attendance valid for 3 years. Paper certificate and photo ID card can be requested at an additional charge.

Agenda

This course covers:

- How electromagnetic fields are generated
- Potential effects of over exposure on the body
- Sources of electromagnetic fields
- The requirements of EMF directive
- Overview of monitors and dosimeter
- National register of RF workers

Equipment covered during training:

- Samples of personal monitors
