

## AutoCAD Essentials Training

### Course Aim

This course provides delegates with a strong foundation in AutoCAD drawing techniques that can be applied across relevant industries such as architecture, engineering (civil, electrical, aerospace), construction, and manufacturing, among others.

By the end of this training, delegates should feel confident using AutoCAD to draw and edit high-quality technical drawings across a wide range of industries.

### Who Should Attend?

The AutoCAD Essentials Training course is ideal for those who need to create or edit 2D drawings, plans or designs. It's designed for delegates with basic computer skills who are confident using Microsoft Windows.

Whether you're new to AutoCAD, self-taught and wanting to learn the correct techniques or moving to AutoCAD from another CAD system.

It's suitable for delegates working in a variety of sectors, including:

- Engineering and construction
- Architecture and design
- Manufacturing and production
- Facilities and maintenance

The AutoCAD Essentials training course requires basic computer and Microsoft Windows skills. If you're unsure about your current level, please contact our team on 0345 605 0006.

### Agenda

The AutoCAD drawing techniques covered in this course are widely applicable across all relevant industries, giving delegates the skills they can confidently apply to their own projects.

Our trainers draw on examples from a variety of disciplines, ensuring the content is both practical and relevant.

This is a hands-on, practical course. Trainers explain the essential theory, demonstrate their technique clearly and guide delegates as they practice using AutoCAD on their own computers.

Delegates will also receive:

- A comprehensive AutoCAD training guide to support learning during the course and as future reference
- 30 days of post-course email support from their trainer to assist with follow-up questions or challenges.

### Certification

This is an Autodesk-accredited course, with an e-certificate awarded upon successful completion. Your AutoCAD Essentials e-certificate does not have an expiry date.

### Course Duration

This is a 3 day course
